ONTARIO BRIDGE GIRDER SET

During the recent construction of the Eucalyptus Bridge in Ontario, CA, Bragg Crane Service and our Engineering department worked together to set the 11 girders with the utmost efficiency and minimized handling. Due to the weight of the girders and space available, a Liebherr LR 1600 was utilized. The weight also required a derrick and counterweight to give more leverage while also utilizing a heavy lift attachment. Multiple drawings were made to find the best way to use the counterweight for the crane, specifically how to allow it to stay in one place. By placing it behind the crane, the weight itself did not need to be moved with each lift, ensuring a cleaner, more efficient and safer job. The photos here show the engineering drawings alongside the project in action, helping depict just how important the work of our engineers is!

EMPLOYEE CELEBRATIONS!

Corporate Thanksgiving Potluck: November 17 *(Pictured Top)*

In a long held tradition at our Long Beach corporate office, the Thursday before Thanksgiving, our Southern California employees gather for a potluck to celebrate the holiday together. This year, after a hiatus since 2019, over 130 employees gathered to express gratitude and eat a delicious meal. The group ate 8 turkeys, 6 hams, multiple trays of stuffing and still had leftovers for lunch the next day, the best part of Thanksgiving!

Corporate Christmas Social: December 8 *(Pictured Bottom)*

Recently, our EMG team at the Long Beach office put on the Holiday Sweater themed Bragg Social! The weather was perfect, so employees gathered outside in their best holiday sweaters, ugly or festive, and ate delicious crepes from the Crepes Bonaparte truck. Over 130 people came to celebrate and a large amount sported their favorite holiday sweaters and were entered in a raffle for gift cards. What could be better than cozy sweaters and Nutella crepes?

Bragg Throwback

RAISING THE CHRISTMAS SPIRIT

Bragg's team often gets contracted to place Christmas trees in shopping centers, including this placement at The Grove in Los Angeles, CA . The tree gets placed and branches reattached before it is decorated.

Merry Christmas and Happy New Year!
